MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDUSTRY STRUCTURE, DEVELOPMENTS, OPPORTUNITIES & THREATS

Indian economy continues to be one of the fastest growing economies in the world. The economic recovery, witnessed after the global meltdown has been sharper than what was anticipated.

India's domestic agro market is growing at compounded annual growth rate of 13.6% in past 5 years and it has grown to achieve more than 5.9 billion units. India plays a major role in global agro markets due to availability of abundant man power, raw material and infrastructural developments. Indian exports in agro sector grew by 11.7% per year in the past 4 years, comprising export.

OPPORTUNITIES

The overall assessment of demand and market potential, projected on the basis of past trends and industry expectations, is expected to grow by more than 10%. Domestic consumption of agro products is increasing due to growing corporate salaries, earning capacity of individuals. India is home to 17% of world population. It is also one of the youngest countries in the world, with over 65% population below the age of 35 years. In India, there are more than 30 crore middle class people with higher disposable income. The number is expected to be doubled in next 2 years, which will bring increasing demand for various consumer products by this segment of population.

THREATS

Due to global meltdown, the consumers in the west have reduced their consumption of agro materials.

The post 2005 trade regime under World Trade Organisation has resulted into the enhanced competition across the globe.

SEGMENTWISE or PRODUCT- WISE PERFORMANCE

Our company operates in agro product segment, within domestic market only. After years of closure of business, the management of your company has started trading activity in domestic agro market. The business is expected to grow in the coming years.

FUTURE OUTLOOK

Tremendous boom in retailing industry is basically due to increase of consumption of household products. Due to significant increase in income levels, the consumption pattern has also changed. The life style of individuals is changing and they are preferring products under premium segment. Despite temporary setback for few months due to global meltdown, Indian economy had recovered faster than expected. The adverse impact of western financial meltdown is not acutely felt due to domestic industry and consumption.

Your company has taken various initiatives for increase of business, product portfolio. Presently,

We are doing business in domestic market but we are exploring possibilities of export of our products to the western countries, where we had been doing business about a decade ago. We are also exploring the possibilities of leasing out an industrial unit to enhance our productivity and launching of quality products in the market.

STRENGTHS

Your company is the owner of brand 'ANGELS'. In the coming years, we may plan to launch it as an agro brand in the country. Due to growing multi brand outlets, we do not foresee any difficulty in pushing the brand in the domestic market. We had a customer base in western markets for ANGELS products. We can leverage our capacities to procure products for export markets also.

RISK AND CONCERNS

Business is exposed to external and internal risks. Some risks can be predicted and minimized with careful planning and implementing the

measures to mitigate them, while some risks cannot be insured against. Your company has been facing many risks including risk to run business due to shortage of working capital. The tight fund situation may affect company's plans to enlarge its business activities. Due to tight liquidity position, we are not able to lay hands on talented people in the industry. The management of your company is planning to leverage their personal assets to raise funds for the company, to overcome this risk.

The domestic market is showing inflationary tendencies. To curb inflation, the Reserve Bank of India can tighten its monetary policy, which can affect company financial expenses. Fluctuation in value of foreign currencies can also affect export plans of the company.

HUMAN RESOURCES

The company is taking various initiatives to increase human resources for better productivity. To save on costs, the company is appointing non-experienced staff and taking initiatives for internal training and development of skills. This will help in enhancing their emotional and intellectual engagement with the company.

INTERNAL CONTROL SYSTEM AND ADEQUACIES

Your company had started its business from scratch. To grow it faster, the integrity and ethical behavior of management and employees at all levels and compliance of the laws and regulations is very essential. The systems are being put in place to ensure adequate internal controls in operations of the company. Apart from statutory audit, your company has adequate in-house internal audit practices.

FORWARD LOOKING STATEMENT

Statements in this report on Management Discussion and Analysis, describing the company's objectives, projections, expectations or predictions may be forward looking, considering the applicable laws and regulations. These statements are based on certain assumptions and expectation of future events. Actual results could, however, differ materially from those expressed or implied. Domestic consumption, price

trends, change in government regulations and tax structure can make a difference in company's performance in future.

The company assumes no responsibility in respect of the forward looking statements herein, which may undergo changes in future on the basis of subsequent developments, information or events
